Brazil

ENGAGEMENT

Corporate website design
and build

Overview

Albatroz MGA is a managing general agent specialising in transport and logistics insurance. It underwrites cargo and transport risks on behalf of leading insurers and reinsurers, backed by a digital platform for quotes and claims. Ecomsy designed and built its corporate website in Portuguese.

Business challenges

- **A technical market.** Brokers and carriers need to see quickly that the MGA understands transport risk in depth.
- **A broad product range.** Traditional covers, exclusive solutions, reinsurance and claims administration all need a clear place.
- **Partners, not just customers.** The site has to recruit brokers as well as inform them.

The scope

A clear, credible corporate website that presents the products, the solutions and the digital platform, and makes it easy to become a partner.

Key priorities

- Organise products by risk profile
- Show the digital platform
- Make partner sign-up obvious
- Read naturally in Portuguese

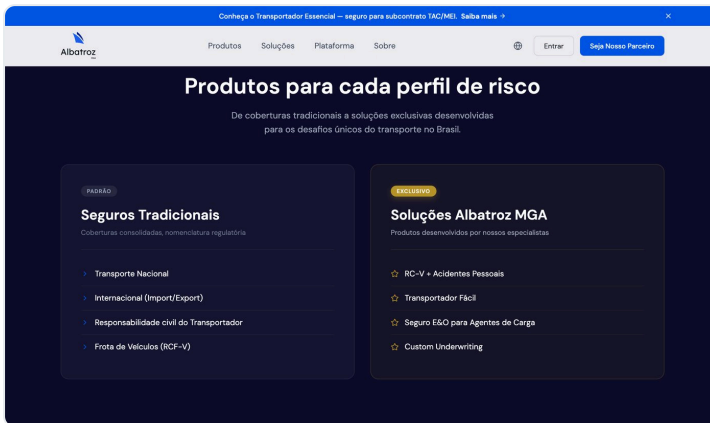

Solution

We structured the site the way a broker thinks: what risks you cover, how you work, and how to start.

- **Products by risk profile.** Traditional covers and Albatroz's own solutions, side by side.
- **Solutions across the chain.** Insurance, reinsurance, claims administration and technology, each with its own block.
- **The platform, shown.** The dashboard for policies, claims and billing, presented in context.

The result. A corporate site that reads as an expert in a technical market and gives brokers a clear way in.

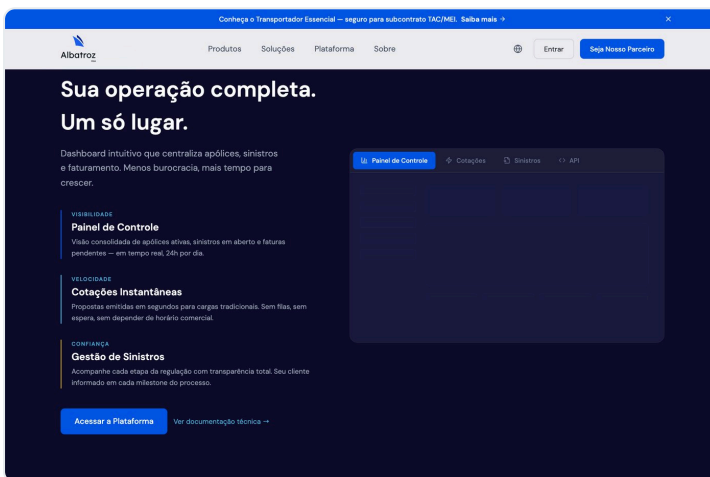

Key features

01

Products for every risk profile

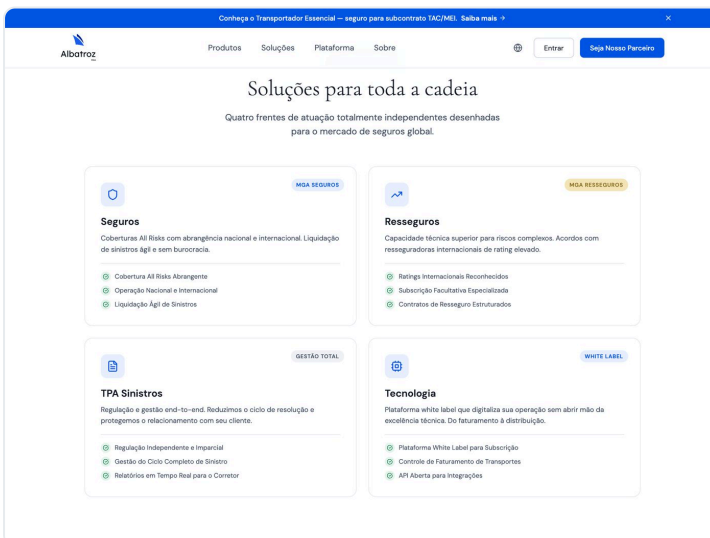

Traditional transport covers alongside Albatroz's exclusive solutions.

02

The whole operation in one place

A dashboard that centralises policies, claims and billing.

03

Solutions for the whole chain

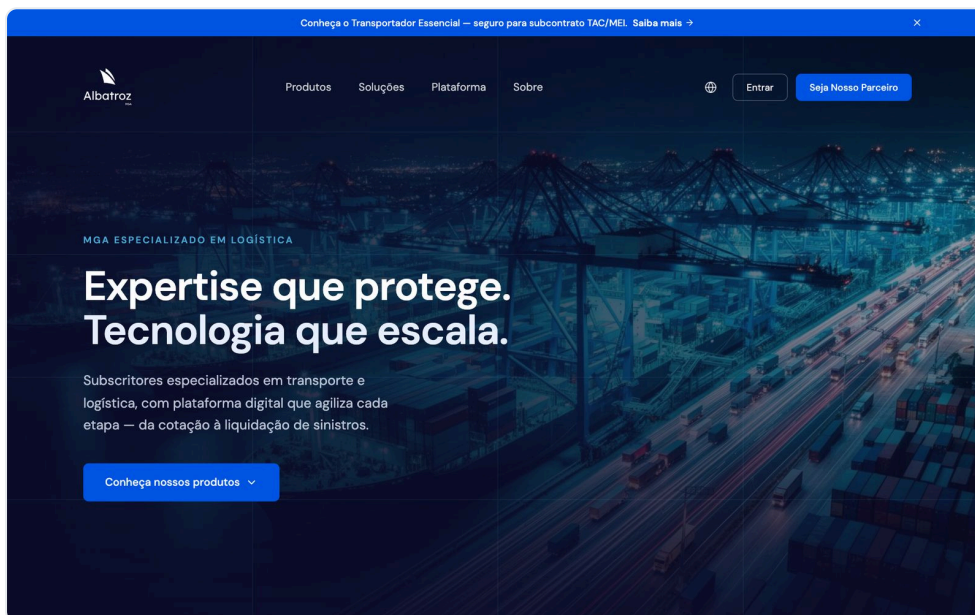

Four independent lines of work: insurance, reinsurance, claims administration and technology.

Tech stack

- **React.** Interface
- **Vite.** Build tooling
- **Portuguese-first content.** Written for the Brazilian market
